EXPERIENCE

GENERAL ASSEMBLY

Software Engineer | New York City

February 2013 -
Present

- Currently lead technical development on GA Profiles (ga.co/profiles), a product that connects GA alumni with potential employers. Interesting features include: routing email messages through the app to monitor response rates, a multi-step form to build profiles that can also pull in data from LinkedIn, using Backbone to associate hiring locations asynchronously, and implementing caching view partials that expire on a record's update to speed up the homepage response time.
- Before GA Profiles, worked in a conversion focused development team that produced a new user flow for instructor leads with improved data tracking and analytic events.
- Other past projects include: writing a Ruby gem to customize the marketing team's CMS platform, pair-programming with senior developers on an internal OmniAuth strategy for user accounts, and using Compass to apply GA's SASS styles to its Wordpress blog.
- Teaches "Web Development: Let's Break It Down" workshop and was an expert in residence for GA's Back-end Web Development part-time course during the fall 2013.

EDUCATION

GENERAL ASSEMBLY

Web Development Immersive (WDI) | New York City

October 2012
- December 2012

- 9 week full-time intensive program on full-stack web development
- My final project, [Community Spring](#), allowed Facebook users to find and RSVP to local community service events listed on NYC OpenData

Data Science (DS) | New York City

September 2014
- November 2014

- 11 week part-time program on data munging and regression modeling
- My [final project](#) built regression models based on a text analysis of Foursquare user reviews and NYC restaurant sanitation grades

GEORGETOWN UNIVERSITY

B.A. Economics, Minor in Film & Media Studies | Washington, D.C.

August 2010
- May 2012

- GPA 3.873 / 4.00, graduated magna cum laude
- My senior film thesis was a short documentary about "third culture kids" called [So Where's Home](#)

SKILLS

Languages

Ruby, JavaScript, HTML, CSS, Python, SQL, HAML, SASS, CoffeeScript

Frameworks + Libraries

Rails, jQuery, Backbone, Sinatra, Node, Pandas, Scikit-Learn, Grunt, Compass

Testing

RSpec, Capybara, Jasmine, Cucumber

Other Tools

Git, Vim, Adobe Creative Suite

INTERESTS

- Web Development
- Product Development
- Filmmaking
- Graphic Design
- Emerging Markets
- Southeast Asia
- Data Science
- Food Photography
- English Football

FUN FACTS

- Three WDI classmates and I won OpenShift's sponsor prize at the 2013 Fintech Hackathon NYC for our Rails app, [Social Fund](#)
- I was born in Florida, raised by Filipino parents, and lived in Singapore for 16 years making me a third culture kid (TCK).
- I cycled with my brother and three others from Kunming, China to Hanoi, Vietnam to raise money for rural schools in China and Sierra Leone
- I ate a yak burger in Lhasa, Tibet
